The Board of BNP Paribas Cardif Försäkring AB (the "Company") herewith presents the Solvency and Financial Condition Report for the financial year 2020.

Special note for the 2020 report:

The coronavirus outbreak characterised by the World Health Organisation as a pandemic on 11 March 2020 as well as measures introduced by governments and regulators to tackle the outbreak have affected the global supply chain as well as demand for goods and services and therefore had a significant impact on the global growth. At the same time, fiscal and monetary policies have been eased to sustain the economy.

The consolidated financial statements of BNP Paribas have been prepared on a going concern basis and take into account the recommendations from local regulators and standard setters relating to COVID-19 and its consequences. The impacts of the pandemic primarily affect the level of new business and claims observed and the valuation of financial assets. They are mitigated by the contra-cyclical measures that underlie the risk assessment, the risk management framework for financial or technical risk hedging, the impact of the measures taken by the public authorities or set out by the insurance regulation to sustain the economy.

Summary

The Company writes non-life insurance in the Nordic markets and distributes its products mainly through banks, finance companies, insurance companies and card companies. Creditor Protection and Payment Protection Insurance is the Company's largest product line, but the Company supplies other products as well, such as accident, sickness, medical expenses coverage and income protection insurance.

The Company has branch offices in Denmark and Norway, and operates through freedom of services in Finland.

In 2020, the Company's gross written premiums amounted to 534 327 KSEK (701 322 KSEK in 2019).

The result for the year after taxes amounts to -31 424 KSEK (23 217 KSEK in 2019).

In 2020, the COVID-19 crisis has affected the sales volumes and the number of claims of the Company impacting negatively the overall result. The measures taken by the governments of the Nordic countries have slowed down the credit activity and by consequence the sales volumes of the Company (-24%), which are strongly linked to the volumes of new credits granted by banks and financial institutions. Another impact of the pandemic and of the governmental measures is the increase of the unemployment rate in the Nordic countries, and as Involuntary Unemployment is one of the main risks covered by the Company, the number of claims has increased, affecting the technical result (-31%).

Thanks to the reactivity of the management, a crisis management team was created and took decisions in order to mitigate the impacts of the pandemic. The main measures taken by the Company were:

- In terms of business, sales on existing loans were adapted during the first wave of the pandemic to avoid anti selection,
- In terms of operations a claims administration automation solution was developed in order to be able to absorb the increase of claims,
- In terms of internal organization, in order to avoid the spread of virus within the staff and to ensure business and service continuity, all employees were equipped to work remotely.

Assets under management amounted to 706 670 KSEK as at December 31st (707 394 KSEK as at December 31st 2019). Income from asset management amounted to 8 367 KSEK (4 415 KSEK in 2019).

The Solvency position of the Company shows a coverage ratio of 241% as at December 31st (212% as at December 31st 2019) of the SCR, well in excess of the target of 130%.

This Solvency and Financial Condition Report is produced in accordance with the Solvency II Directive. It covers the business and performance of the Company, its system of governance, risk profile, valuation for solvency purposes and capital management. The ultimate responsibility for all of these matters lies on the Company's Board of Directors, with the help of various governance and control functions that it has put in place to monitor and manage the business of the Company.

A. Business and Performance

A.1 Business

The Company is a limited liability insurance company, with company registration number: 516406-0567. The Company is under the supervision of Finansinspektionen, Box 7821, 103 97 Stockholm, Sweden.

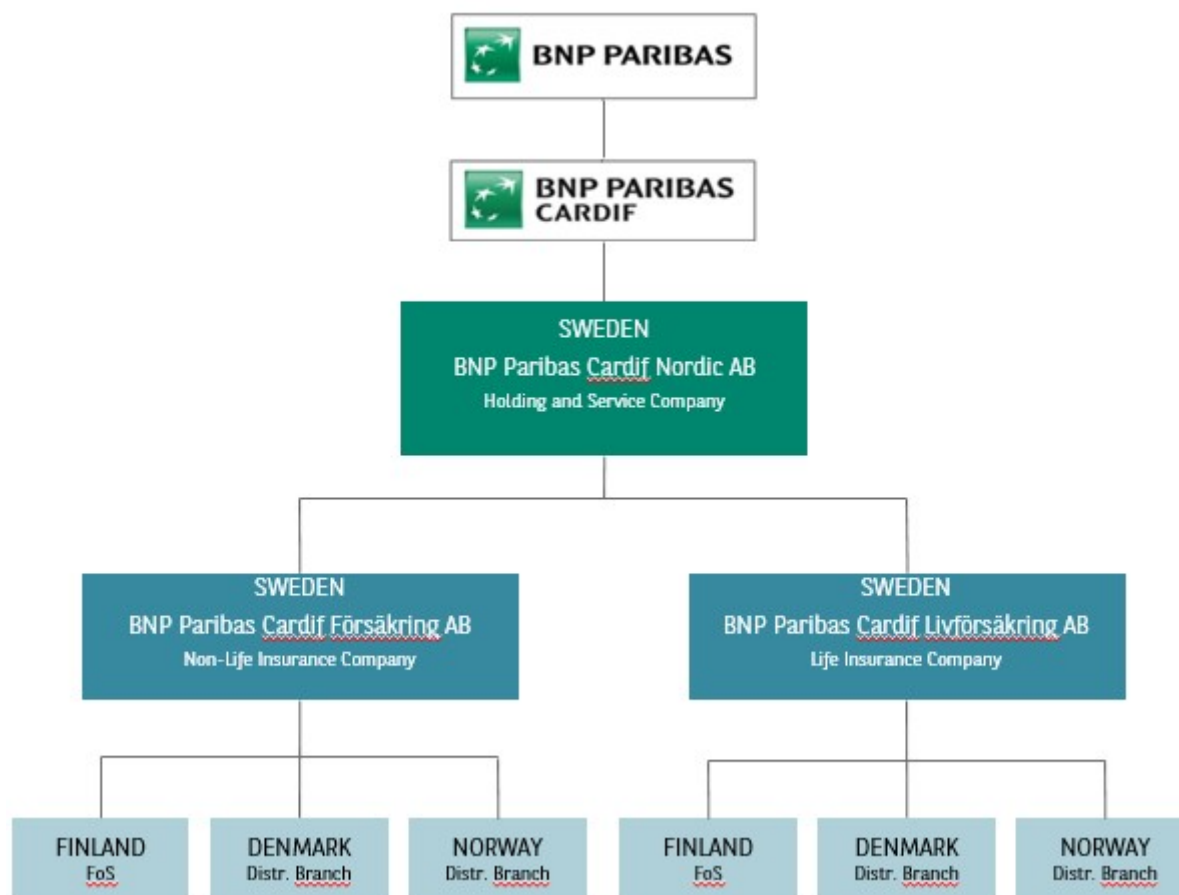

The Company's external auditor is PriceWaterHouseCoopers AB, 113 97 Stockholm. Responsible for the audit: Morgan Sandström.

The Company is a subsidiary of BNP Paribas Cardif Nordic AB, which in turn is wholly owned by BNP Paribas Cardif SA, which is the insurance subsidiary of the French banking group BNP Paribas. Mother company of the group is the French bank BNP Paribas S.A. (corp. ID No: 662 042 449) with registered office in Paris. BNP Paribas Cardif SA is under the supervision (group supervision) of the French supervisory authority ACPR.

BNP Paribas Cardif Nordic AB is the mother company of two insurance entities: BNP Paribas Cardif Försäkring AB and BNP Paribas Cardif Livförsäkring AB. These three companies are organized around a common Nordic platform, where employees have an employment contract with either BNP Paribas Cardif Nordic AB or BNP Paribas Cardif Försäkring AB. There are outsourcing agreements between the consolidated companies within the Nordic group.

The key entrepreneurial risk taking function (KERT) is now performed only in Sweden. With this follows that from January 1st 2021, the branches in Norway and Denmark will become commercial branches and that all insurance result will be booked in the Swedish entities while the branches will be remunerated for their services to sell and market our insurance products. This change will allow centralizing and simplifying the administration of the Company.

See below corporate organization chart.

BNP Paribas

BNP Paribas is a European leader in global banking and financial services. The Group has around 196 000 employees and operates in more than 72 countries, of which four are considered domestic markets (France, Belgium, Italy and Luxembourg).

BNP Paribas Cardif

BNP Paribas Cardif is the insurance subsidiary of BNP Paribas. The primary business model is bank assurance which means that BNP Paribas Cardif supplies protection and savings solutions to end clients via the distribution networks of actors such as banks and finance companies (B2B2C model). The bank assurance business model was introduced in France in 1973, which means that today BNP Paribas Cardif has over 40 years of experience of the concept.

In total, BNP Paribas Cardif has around 500 partners, amongst which are leading banks, finance companies, insurance companies, card companies, retailers, utilities and broker networks.

BNP Paribas Cardif has subsidiaries in 33 countries in Europe, Asia, Latin America and Africa and has about 100 million policy holders and 8 000 employees.

The Company's business and result

The Company writes non-life insurance in the Nordic markets and distributes its products mainly through banks, finance companies, insurance companies and card companies. Creditor Protection and Payment Protection Insurance is the Company's largest product line, but the Company supplies other products as well, such as accident, sickness, Medex and income protection.

The Company has commercial branch offices in Denmark and Norway, and operates through freedom of services in Finland.

In 2020, the Company's gross written premiums amounted to 534 327 KSEK (701 322 KSEK in 2019).

The result for the year after taxes amounts to -31 424 KSEK (23 217 KSEK in 2019).

Assets under management amounted to 706 670 KSEK as December 31st (707 394 KSEK as at December 31st 2019). Income from asset management amounted to 8 367 KSEK (4 415 KSEK in 2019).

A.2 Underwriting Performance

Underwriting income

Evolution Gross Written Premium 2019/2020 by country

K SEK

Country	Gross written premium 2019	Gross written premium 2020	Evolution
Denmark	77,818	47,767	-39%
Finland	123,097	30,754	-75%
Norway	149,586	102,044	-32%
Sweden	350,821	353,762	1%
Total	701,322	534,327	-24%

The decrease of GWP which is observed is due to the termination of one of the partnerships in Finland and in Denmark combined with the lower sales in 2020 due to Covid-19 crisis.

Profit & Loss 2020/2019

<i>Profit and loss account</i> (KSEK)	2020	2019
Earned premiums, net of reinsurance	555,213	717,498
<i>Premiums written</i>	534,327	701,322
Allocated investment return transferred from the non-technical account	2,996	1,277
Claims incurred, net of reinsurance	- 206,263	- 158,085
Change in other technical reserves (after reinsurance)	-	-
Bonuses and rebates, net of reinsurance	- 27,938	- 35,130
Subtotal for non-life insurance business	- 64,005	10,156
Profit or loss for the financial year	- 31,424	23,217

- The claims incurred increase with the increase of claims due to the Covid-19 crisis leading to a negative technical result in 2020.

Expenses

- Expenses are decreasing from 515 MSEK in 2019 to 388 MSEK in 2020.
- The decrease is mainly related to volume decrease resulting in less commission paid to partners (acquisition and administration tasks partly outsourced to partners). The lower commissions are partly mitigated by higher overhead costs.
- Overhead costs increased mainly due to more allocated costs from the mother company that acts as a shared service operation for the insurance company, to face business development as well as regulatory and security requirements.

A.3 Investment Performance

The investment portfolio comprises corporate bonds, covered mortgage bonds of high credit quality, government bonds, municipality securities and cash. The total portfolio was valued at 706 670 KSEK as at 31 December 2020 (2019: 707 394 KSEK) out of which 47% in Swedish covered mortgage bonds, 30% in Swedish corporate bonds, 10% in Norwegian government bonds, 10% in Swedish municipality securities, 3% in a Mutual fund, and marginal holdings in cash (SEK, NOK, and DKK).

In KSEK

Assets under management K SEK	Total Market Value	Weight	Modified Duration	Total Return
Norwegian government bonds	72 425	10,3%	0,28	0,90%
Swedish government bonds	-	-	-	-
Swedish municipality securities	71 677	10,1%	2,29	0,88%
Covered mortgage bonds	329 952	46,7%	3,33	1,37%
Corporate bonds	208 312	29,5%	1,17	1,09%
Mutual fund	21 341	3,0%	4,71	2,33%
Cash	2 963	0,4%	-	-
Total	706 670	100,0%	2,30	1,20%

These investments are held to cover technical provisions of the Company for related liabilities. The asset selection and investment is outsourced to an external asset manager. The outsourcing are supervised by the internal finance and risk departments and by group asset management during asset management committees.

Total net investment return for the year is 8 367 KSEK (2019: 4 415 KSEK) which comprises interest earned on financial investments of 3 905 KSEK (2019: 4 403 KSEK), realized gain on bonds of 514 KSEK (2019: 1 091 KSEK), and

unrealized result of 3 948 KSEK (2019: -1 079 KSEK). This return corresponds to a performance of 1.2% for the Company's portfolio in 2020.

It is worth to mention that assets held in foreign currencies at the Swedish company level are subject to yearly re-evaluation based on closing exchange rates. It has an impact on our investments in NOK and in DKK. The re-evaluation of assets has a P&L effect, which has been relatively stable from year to year; however, it became significant during 2020 explained by the significant weakening in NOK (as an aftermath of oil price crisis in Norway associated with Covid-19). The P&L impact from re-evaluation of assets held in NOK and DKK were in total -9 751 KSEK at 31 December 2020. An action plan to disinvest in NOK was put in force during Q4 2020; and the purpose is to mitigate the currency uncertainty, meanwhile to match the decrease in Norwegian liabilities.

A.4 Performance of other activities

There are no other expenses in the Company of significant value, except income allocated according to the outsourcing agreements that exist between the consolidated companies within the Nordic group.

A.5 Any other information

- In end of the year 2020, there was an important change in the business mix as the Company has terminated its medical expenses insurance portfolio, with customers having the possibility to take out an equivalent policy with other insurers. This change reduces diversification but frees up capital for future growth in the core business lines.

- At the moment this report is edited, the world has been going through an unprecedented health crisis for over a full year, which affects health and lives across the world and impacts the economy and the markets.

The current crisis had impacts on the activity of BNP Paribas Cardif in 2020 but it does not result in any revision or any concern regarding the solvency position.

B. System of Governance

B.1 General information on the system of governance

Board and Management

BNP Paribas Cardif Försäkring's Board consists of three members: Dominique Barthalon, chairman of the board, Jacques Faveyrol (who is Managing Director of BNP Paribas Cardif Nordic AB) and Jeremy Keane.

The Board meets at least six times per year to determine the company's strategic direction, to review the company's operating and financial performance and to oversee that the company is adequately resourced and effectively controlled.

The Managing Director, Jan de Geer, is responsible for implementing the decisions of the Board. To assist with this, there is a Management Committee and an Executive Committee, see more below under Management and Risk Management Committees.

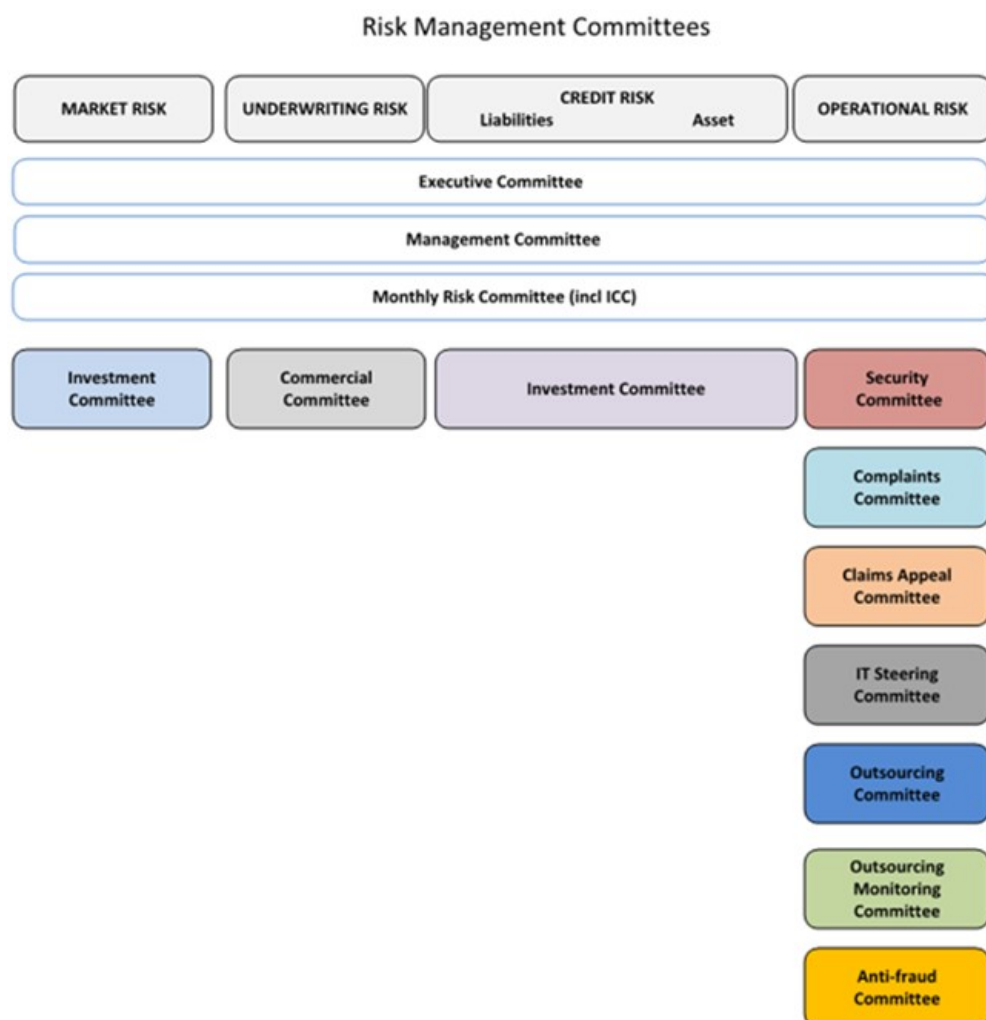

General Managers for the Norwegian and Danish branches

Until December 31st 2020, the Company's branch in Denmark was represented by Jan De Geer, Managing Director of BNP Paribas Cardif Försäkring AB. The Company's branch in Norway was represented by Dag Mevold, Managing Director of BNP Paribas Cardif Livförsäkring AB. In their capacity as general agents for the branches, in accordance with the respective Danish and Norwegian regulations regarding branches, Jan De Geer and Dag Mevold were authorized signatories of the branches.

From January 1st 2021, Philippe Pinsonnat is replacing Dag Mevold as Managing Director of BNP Paribas Cardif Livförsäkring (subject to approval by SFSA), Tore Ustad is replacing Dag Mevold as branch manager in Norway and Finn Berg is replacing Jan De Geer as branch manager in Denmark.

Management and Risk Management Committees

The Company has a number of management and risk management committees for certain key processes, as illustrated below:

Key Functions

The *Risk Management Function* (Permanent Control) assists the Board of Directors and other functions in implementing the risk management system, and to ensure that monitoring and control is setup to support management in governance and decisions. It reports on exposures to risks and assists the Board of Directors in the taking of strategic decisions by shedding light on issues related to risk management. The Risk Management Function is also responsible for the ORSA.

The *Compliance Function* has the responsibility to provide the Managing Director and the Board of Directors with reasonable assurance that the risks of non-compliance, the risks of regulatory and reputation are duly monitored, controlled and mitigated.

The *Internal Audit Function* is responsible for assessing the suitability and effectiveness of the internal control system as well as the other components of governance.

The *Actuarial Function* has responsibility for coordinating the calculation of technical reserves, guaranteeing the appropriate nature of methodologies, the underlying models and assumptions used to calculate prudential technical reserves, assessing the suitability and the quality of the data used, supervising this calculation and comparing the best estimates with empirical observations. From 2017, the Actuarial Function has been outsourced and therefore separated from the manager of the actuarial department.

Remuneration Policy

No remuneration is given to the Board members for the board assignments.

The Board annually adopts a remuneration policy applicable to all staff. The Board is also responsible to ensure a well-defined remuneration assessment process. For this purpose there is a Compensation Committee appointed to be in charge of the preparation of the decisions and appropriate documentation of the policy implementation and follow up. This Compensation Committee consists of the Chairman of the Board, Head of HR and the Managing Directors. The compensations are finally approved at Head Office level.

The remuneration policy complies with the applicable regulations (Article 275 of Commission Delegated Regulation 2015/35 and FFFS 2015:12).

The Company should strive for a sound and reasonable balance between fixed and variable remuneration. The decision on the variable part, should consider the following parameters:

- Amount and costs of extra capital needed to cover for the added risk taken on.
- Amount and cost of the liquidity risk, and
- Risk of expected future income not being realized.

The variable part should include benefits. No threshold should prevent it to be nil. The variable part should never exceed 50% of the fixed salary.

It is important to secure that the individual performance targets stated in an individual contract does not conflict with the long-term financial well-being of the Company.

For employees that can influence the risk level within the Company, deferred payment of variable remuneration shall be applicable (the Company shall defer a substantial portion (at least 60%) of the total bonus for a period of at least three years).

Shares/Options

During the years 2005-2012, the staff in the Company was, at six different occasions, offered to participate in a Discounted Share Purchase Plan (DSPP) in a global employee shareholders fund holding shares in BNP Paribas SA. This is not an offered possibility anymore.

Pensions

The Company has no supplementary pension or early retirement schemes for the members of the Board or the holders of key functions.

Material transactions with shareholder, members of board or management

Not applicable.

B.2 Fit and proper requirements

The Company has adopted a Fit and Proper Policy, which sets out the specific requirements and describes the process for assessing the fitness and the propriety of the persons who effectively run the undertaking or other key functions.

There is also requirements to do Fit and Proper assessments, and provide continuous education of employees working with insurance distribution and/or financial security.

The Fit and Proper assessment process can be described in three steps:

- 1) Assessment of fitness (competence as skills, knowledge, education, capability, reputation, integrity and legal capacity)
- 2) Assessment of propriety (financial soundness, honesty, integrity and reputation) and,
- 3) Potential conflicts of interest shall also be taken into consideration.

Assessment of fitness

Board Members, the Board of Directors' collective qualifications, Managing Director and Branch Manager

The members of the Board, the Managing Director and Branch Manager shall possess appropriate education, qualification, experience and knowledge about at least:

- a) insurance and financial markets
- b) business strategy and business model
- c) system of governance
- d) financial and actuarial analysis and,
- e) regulatory framework and requirements for the authorized business.

Some more areas have been evaluated as important such as knowledge about the analysis of customer value and protection, banking business and insurance mediation/distribution.

Persons responsible for outsourced key functions

If applicable, a person should be appointed within the Company with an overall responsibility for an outsourced key function who is fit and proper and possesses sufficient knowledge and experience regarding the outsourced key function to be able to challenge the performance and results of the service provider. The assessment criteria for the fit and proper assessment of the responsible for an outsourced key function should be based on the assessment criteria for the relevant outsourced function, but considering that the responsible person will not perform the tasks, but oversee them.

Responsible for the actuarial function (outsourced)

The responsible for the actuarial function shall fulfill the specific requirements set out in SFSA regulation FFFS 2015:8, Chapter 9, Section 9-15 having adequate language skills, compliance with the minimum education and professional experience. The responsible person shall continuously ensure that his/hers knowledge is appropriate considering the tasks the person shall perform and the nature of the Company's business, and, if necessary, acquire further education.

Responsible for the other key functions (compliance, risk management, internal audit)

The responsible for compliance, risk management and internal audit functions shall have adequate language skills, compliance with the minimum education, relevant professional experience within the insurance sector, other financial sectors or other businesses, taking into account the respective duties allocated to that person and, where relevant, the insurance, financial, accounting, actuarial and management skills of the person. The responsible person shall continuously ensure that his/hers knowledge is appropriate considering the tasks the person shall perform and the nature of the Company's business, and, if necessary, acquire further education.

The responsible persons for key functions have been notified to and approved by the Swedish FSA.

Assessment of propriety

Assessment of propriety includes:

- identification (civic register or copy of passport),
- certificate that the person is not bankrupt,
- certificate that the person is not subject to a trading prohibition,
- certificate that the person does not have a guardian,
- certificate that the person has not had a license or registration revoked during the past five years, or, been a member of the management of a legal person that has had a license or registration revoked.
- certificate that the person does not have debts which exceed SEK 100,000 and which are executed at the Swedish Enforcement Authority,
- extract from the criminal register.

Conflicts of Interest

Analysis of potential conflicts of interest shall be made, for instance if the assessed person has leading positions or ownership interests in several companies. In the recruitment process and annually there is a process for mapping and identifying conflicts of interest, in accordance with the Company's Conflicts of Interest Policy.

B.3 Risk management system including the own risk and solvency assessment

– Risk Management System

The Board of Directors in the Company has overall responsibility for the establishment and oversight of the risk management framework. For the purpose of ensuring appropriate handling of each category of risk; a risk committee structure as well as a reporting structure has been put in place and adopted by the Board of Directors. Detailed mandates are defined and adopted by the Board of Directors, concerning the ability to take decisions on investments, as well as underwriting, and all other decisions that may affect the risk level of the Company.

In order to control the risk environment the Board has procedures and policies, and function descriptions detailing the roles and responsibilities of key functions.

The Company applies the standard formula and as such, the risks that the Company is exposed to during the lifetime of its insurance obligations are factored into the SCR calculation.

– Managing underwriting risk taking

The underwriting process (launching new insurance products, marketing existing products by new distribution networks or new populations, etc.) is centered on the knowledge of the risks taken, the evaluation of which is standardized by the technical analysis, which requires a review of all the risks of the product under consideration: technical, financial, credit, operational, compliance and business.

The underwriting process also reflects the application of the reinsurance policy.

– Management of market and credit risk taking

Governance covers all key asset management and risk monitoring processes, ensuring compliance with cross-functional requirements and a sound and prudent asset management. Governance covers the following elements:

- Investment policy describing the missions, responsibilities, operating procedures, procedures and controls of the asset management actors.
- Investment Committee to monitor the asset management.
- Investment rules.

Considering both the principles & specific processes of the Asset Management credit risk and the Insurance Activity credit risk, two governances exist on credit risk:

Both governances aim especially at assessing, mitigating and monitoring credit risk within the Group.

Investments are only made on bonds (both state and corporate with high stable ratings) which are the most secured and simple investments in the market; we benefit as well from the expertise of our external Asset Manager in charge of our portfolios.

The valuation of assets and liabilities under risk-neutral model.

– Management of operational risk taking

Operational risk is contingent on underwriting, market and credit risk taking. It also occurs when internal processes fail or when external events occur. This is why the taking of operational risk is approached from two angles:

- The assessment of operational risk when deciding on other risks (underwriting, market and credit) on the one hand,
- Regular assessment of the operational risks of organization and processes and ways to reduce them. This evaluation benefits from the incident reporting mechanism, implemented in the Company.

The risks of non-compliance and reputation are controlled by compliance with laws, regulations and professional ethics, by protecting the reputation of the Company, its investors and its customers, and by ethics in professional behavior of employees in the service of the Company.

The Risk Management function is responsible for monitoring the effectiveness of the risk management framework, as well as advising the business on risk management related matters, such as monitoring and control methods.

In addition, the internal audit regularly assesses the compliance with risk management policies and procedures, and reviews the adequacy of the risk management framework in relation to the risks faced by the Company.

ORSA process

The ORSA process, as defined in the ORSA policy adopted by the Board of Directors, has been defined as set out below.

The Monthly Risk Committee (including the Managing Directors) define the stress scenarios to be used for the ORSA exercise. The scenarios are chosen based on the main risks of the organization and their estimated potential impact and probability.

The proposed stress scenarios are reviewed and challenged by the Board of Directors, and final adoption of scenario selection is made before the detailed calculations and analysis are initiated.

A cross functional group including the Monthly Risk Committee members and the Finance team defines a detailed planning for the production of the ORSA, with clear deadlines and gates (dependencies).

The calculations detailing the outcome of the stress tests and scenarios are carried out by the Finance and Actuarial departments. Inputs are given by other functions, primarily the Sales Department and Operations, to determine the impact on premium volumes and costs (including staffing). All calculations are subject to a four-eye validation process before being added to the final report.

A final draft report is presented to the Board of Directors for comments and input. It is also submitted for comments and opinion to the external actuarial function holder. The final ORSA, taking added input into account, is adopted by the Board of Directors before submission is made to the SFSA.

Assessment of solvency needs and integration of capital management and risk management

After each prudential closing and in relation to budget updates, a review of the capital planning may be necessary if result is showing a significant deviation from earlier prognosis.

The capital planning for the central scenario is performed during the yearly budget process in August and updated during the ORSA process where the following projections are made on the midterm business plan (three years):

- Forward looking assessment of the SCR, the SCR ORSA and the MCR in order to assess the corridor values.
- Forward looking assessment of the own funds taking into account the dividend policy.

The capital planning takes into account the outcome of the stress tests performed during the ORSA process to:

- enable a good understanding of the capacity to absorb unexpected shocks; and
- propose a review of the calibration of the lower boundaries defined for the own funds within this policy if this appears necessary.

This should determine if a call of additional capital is necessary to reach an adequate capital position by year end. The results are communicated to the Board of the Company and the Group Financial Management team.

B.4 Internal control system

The Board has the overall responsibility for maintaining the systems of internal control of the Company and for monitoring their effectiveness, while the implementation of internal control systems is the responsibility of the executive management, supported by the Risk management function. The Company's systems of internal control are designed to manage, rather than eliminate, the risk of failure to achieve business objectives, and can provide only reasonable, and not absolute, assurance against material financial misstatement or loss.

The systems are designed to:

- safeguard assets;
- maintain proper accounting records;
- provide reliable financial information;

- identify and manage risks;
- support the operations in being compliant and in mitigating and/or eliminating the compliance risks in Personal Data Protection (the area is monitored by the Data Protection Correspondent);
- maintain compliance with appropriate legislation and regulation; and
- identify and adopt best practices.

The Company has an established governance framework, the key features of which include:

- Risk Management Policy including Internal Control Guidelines,
- a well-defined structure of risk committees,
- a clear organizational structure,
- documented delegation of authority from the Board to executive management,
- policies and procedures, which set out risk management and control standards for the Company's operations.

There is an ongoing process for identifying, evaluating and managing the significant risks faced by the Company. The Company's risk management and control framework is designed to support the identification, assessment, monitoring, management and control of risks that are significant to the achievement of its business objectives. The Company has a set of formal policies that govern the management and control of both financial and non-financial risks.

Compliance Function

The Compliance function is directly subordinated to the Managing Director in the Company.

The purpose of the Compliance function may be summarized as the responsibility to support the operations in being compliant and in mitigating and/or eliminating the compliance risks in the following areas:

- Customer interest/protection
- Market integrity
- Financial Security (Prevention of Financing of terrorism including bribery and breach of financial sanctions)
- Regulatory systems and controls
- Professional Ethics
- Corporate Social Responsibility (the area is monitored by the HR department)
- Relations with Supervisory authorities

The Compliance function is responsible for monitoring and controlling the risk of non-compliance with regulations related to the licensed business, as well as professional standards and internal procedures and instructions. In addition, the function shall perform analysis of the possible impact of any change in the legal environment on the Company's operations and provide trainings on compliance topics.

The Compliance function is responsible for composing an annual activity plan based on the identified compliance areas. The Managing Director adopts the activity plan and the responsible for the Compliance function informs the Internal Control Committee ("ICC") and the Board of Directors of its content/scope.

The Compliance function shall at least annually, and/or when needed, submit a written summarized report including an analysis of the Company's compliance environment and present it to the Board of Directors. The Compliance function shall also annually and quarterly submit reports of its activities including an analysis to the Board of Directors and to the Managing Director of the Company.

B.5 Internal audit function

The Internal Audit consists of the combined use of Group Internal Audit "Inspection General", and an outsourced local Internal Audit Function.

The activities of the Inspection General are defined by the Internal Audit Policy of BNP Paribas Cardif Group.

The activities of the local Internal Audit are defined by the local Internal Audit policy as adopted by the Board of Directors of the Company. The policy is reviewed on an annual basis and subject to annual adoption. No significant changes were made to the Local Internal Audit Policy during 2020.

The Internal Auditors intervene independently throughout the auditable scope of the Company. They can seize any subject and have free access to all documents, assets and personnel working directly or indirectly for the Company. Similarly, they are free to issue their conclusions in full independence from the management of the insurance group. They must remain independent, objective and impartial in their investigations, and cannot directly undertake any operational management action.

The local Internal Audit Function performed audits according to the plan adopted by the Board of Directors.

Inspection General (IG):

In the group, the head of the internal audit function reports regularly to the Board of Directors of the BNP Paribas group (or to the dedicated committee that represents it) the results of the work of the function. For audits to be performed in the Nordics, it submits a proposal for an audit plan detailing the internal audit missions to be carried out. This audit plan is based on, among other things, an assessment of the risks borne by the various activities of the Group, and by ensuring that all material activities are periodically reviewed.

Local Internal Audit:

The Internal Audit function is outsourced to a local provider. Their task is to review, evaluate and report the activities of all operations, including the risk control and compliance functions. The local internal audit reports directly to the Board. The persons in charge of the Internal Audit are not responsible for any other key function, hence no such conflict of interest and/or appropriateness has to be considered.

B.6 Actuarial function

The Actuarial Function Holder (AFH) is outsourced to the company FCG and the AFH is Erik Gustafsson. The responsibilities of the AFH are listed in an annual plan shared to the Board.

B.7 Outsourcing

The Company may, in accordance with the Outsourcing Policy adopted by the Board of Directors, outsource activities when the use of external providers shows obvious advantages in terms of costs and flexibility. Outsourcing may also be made when the required competence or systems are not available in-house. Outsourcing of important or critical activities or operational functions must not:

- materially impair the quality of the Company's system of governance;
- unduly increase the operational risk;
- impair the ability of the supervisory authorities to monitor the Company's compliance of its obligations; nor
- undermine continuous and satisfactory services to the Company's policy holders.

Outsourcing procedure

The Company has a specific outsourcing coordinator.

Any activity outsourced, defined as critical, shall be handled in accordance with the Outsourcing Policy. The decision to outsource should be formalized by a decision based on a risk assessment provided by all concerned functions (to cover the entire risk perspective).

There is a template agreement to be used for outsourcing agreements, safeguarding all the legal requirements for outsourcing of critical activities.

Monitoring and supervision

Each function that outsources an activity is responsible for monitoring the risks associated with each stage of outsourcing (as well as during the production phase, when the service has been implemented by the service provider). Each function is supported by the outsourcing coordinator. The result of this monitoring is presented to the management of the company at the Outsourcing Monitoring Committees that are held once per year. In addition, any follow up actions are followed up during a Monitoring Risk Committee.

All outsourced service provider contracts include a right for the Company and its supervisory authority to audit the activity if requested.

Outsourced critical functions/activities

The Company's distribution model is completely based on distribution by partners. Certain partners perform other tasks than pure intermediation of insurance, such as premium collection, keeping of insurance register, subscription of insurance policies etc. Such outsourcing constitutes more than half of the outsourced services. Such outsourced activities are carried out in all the markets where the Company operates, i.e. Sweden, Denmark, Finland and Norway.

Some activities are outsourced within the group, such as provision of IT platform. These services are performed by group companies in France.

Claims handling activity for Finland are performed by a specialized company in Finland.

A member of the Board is appointed responsible for the outsourced Local Internal Audit Function.

The actuarial function is outsourced and the responsible for this outsourcing is the Managing Director of BNP Paribas Cardif Nordic AB.

All outsourced critical activities have been duly notified to the SFSA.

B.8 Any other information

The Company has defined a governance system, with well-defined organization, steering documents and mandates that is found to be appropriate for the type and size of the business. The system is subject to regular review and update whenever required by change in regulation, environment or due to internal causes.

C. Risk Profile

The SCR (Solvency Capital Requirement) is the level of own funds required to absorb a full series of bicentenary impacts after accounting for the correlation between risks. It is calibrated to cover such an event with a return period of 200 years within a one-year timescale (Value at Risk at 99.5%).

The Company's SCR is assessed by means of the standard formula proposed by EIOPA. It corresponds to the sum of the net BSCR (Basic SCR), of the operational SCR, and the tax adjustment. The BSCR is based on a bottom-up approach, in other words its calculation is divided into risk modules, themselves divided into sub-modules. The capital requirements for each of the various risks are aggregated by means of a correlation matrix.

The information presented in this chapter deals with the nature of the risks to which the Company may be exposed, the evaluation techniques used, the significant risk concentrations as well as the mitigation techniques set up, and the procedures for monitoring their effectiveness.

C.1 Underwriting risk

C.1.a Definition

Underwriting Risk is the risk of a financial loss caused by a sudden, unexpected increase in insurance claims. Depending on the type of insurance business (life, non-life), this risk may be statistical, macroeconomic or behavioral, or may be related to public health issues or disasters.

C.1.b Risk exposure

The underwriting risk of the Company consists of the following risk-modules along with its included lines of business (LoB):

- Life underwriting risk:
 - Other life insurance: Cover of critical illness risks
- Health underwriting risk:
 - Health NSLT underwriting risk:
 - Medical expense insurance: Cover of medical expense risks.
 - Income protection insurance: Cover of accidental death and disability risks.
- Non-Life underwriting risk:

- Miscellaneous financial loss: Cover of involuntary unemployment risks and other non-life risks (mainly accidental damage).

The partition of the SCR for underwriting risk into its risk-modules and the evolution from 2019 to 2020 is given in the following table.

Remark: there is no more liabilities for the LoB Fire and other damage to property insurance in 2020 due to the cut-off of the business in 2019.

From January 1st 2021 the Company has cut-off the Medical Expenses Insurance business.

K SEK

SCR Underwriting	2020	2019	Variation
Sub-modules Life	729	2,187	-67%
Diversification	-129	-490	-74%
Life underwriting risk	600	1,697	-65%
Sub-modules Health	117,751	145,062	-19%
Diversification	-5,558	-5,543	0%
Health Underwriting risk	112,193	139,519	-20%
Sub-modules Non-Life	175,228	234,210	-25%
Diversification	-32,011	-54,770	-42%
Non-Life underwriting risk	143,217	179,440	-20%
Sum of risk modules	256,010	320,656	-20%
Diversification	-73,987	-93,092	-21%
Total SCR Underwriting	182,023	227,565	-20%

Risk - module (TSEK)	2020
Life underwriting risk	600
Health Underwriting risk	112,193
Non-Life underwriting risk	143,217
Total SCR Underwriting	182,023

Contribution of sub-modules to the Life underwriting risk

Contribution of the risk modules to the Underwriting risk

The most significant risk module is the Non-Life module followed by the Health risk module. The Life underwriting risk is not significant for the Company.

C.1.c Risk management and monitoring

The mechanism for monitoring and managing the underwriting risk is based on governance and documented processes. Risks underwritten must comply with delegation limits set at several local and central levels based on estimated maximum acceptable losses, estimated Solvency 2 capital requirements, and estimated margins on the policies concerned. Each contract is priced in reference to the objectives for rate of return and return-on-own funds set by the Executive Management of BNP Paribas Cardif Group.

Underwriting risks are periodically monitored within the scope of the risk monitoring, based on a dual mechanism:

- Monthly monitoring dashboards;
- Monthly risk committee.

C.1.d Stress tests and analyses of sensitivity

At the time of pricing, approval of a product requires systematic analysis of negative (stress test) or very negative (crash tests) scenarios. The stress tests and crash tests are carried out over the same period as the baseline scenario.

Stress scenarios for the major risks identified by the management of the company are presented in the ORSA.

C.2 Market risk

C.2.a Definition

Market Risk is the risk of a financial loss arising from adverse movements of financial markets. These adverse movements are notably reflected in prices (foreign exchange rates, bond prices, equity and commodity prices, derivatives prices, real estate prices...) and derived from fluctuations in interest rates, credit spreads, volatility and correlation.

C.2.b Risk exposure

The Company invests all of its assets on liquid or very liquid assets with high credit quality (see the table in A.3 Investment Performance).

The market risk SCR is 29 633 KSEK after diversification as at 31 December 2020, compared to 40 529 KSEK as at 31 December 2019.

The risk modules forming the market risk SCR split as follows:

The **interest rate risk** module aims at quantifying the capital requirement needed to cope with the impact on the balance sheet value of an upward or downward change in the yield curve. The capital requirement is equal to the impact of the increase in the yield curve and the impact of the decrease in the yield curve. For each maturity, the shocks caused by the increase or decrease are expressed in proportion to the rates by duration.

The **spread risk** module aims to quantify the capital requirement corresponding to the risk of an upward trend in credit spreads (difference in actuarial rate between a bond and the rate of an equivalent risk-free government bond). The spread shock depends on the duration of the rating of the interest rate products. As with the rate risk, its evolution is linked to the make-up of the bond portfolio.

The **currency risk** (foreign exchange rate risk) module aims to quantify the capital expense of a 25% impairment of foreign currencies against the SEK. The exposure of the Company stems on investments and cash denominated in foreign currencies (NOK, DKK and EUR).

The **concentration risk**: the governance for the asset management lays down the rules for the spread of assets. These rules are set out in the investment policy and guidelines and specify limits per issuer on fixed income instruments and rating category.

The **diversification module** is materializing the correlation between the risk components. The larger diversification effect in 2020 is following the higher concentration risk which is highly subject to diversification.

C.3 Counterparty risk

C.3.a Definition

Counterparty Risk is the risk of loss or of adverse change in the financial situation, resulting from fluctuations in the credit standing of issuers of securities, counterparties and any debtors to which insurance and reinsurance undertakings are exposed, in the form of counterparty default risk, or spread risk, or market risk concentrations. Among the debtors, risks related to financial instruments and risks related to receivables generated by the underwriting activities (premium collection, reinsurance recovering...) are distinguished into two categories: "Asset Credit Risk" and "Liabilities Credit Risk".

C.3.b Risk exposure

The counterparty risk SCR was at SEK 6 million as at 31 December 2020 (SEK 5 million in 2019).

C.3.c Risk management

The counterparty risk on reinsurers is managed through a stringent selection of counterparties and regular monitoring of the main exposures.

Partner counterparty risk is assessed and monitored in the KYI (Know Your Intermediary) Process, at commencement of relationship and regularly. Ring-fenced accounts are normally set up for premiums collected by partners, as and when required under local regulations.

C.4 Liquidity risk

C.4.a Definition

Liquidity Risk is the risk of being unable to fulfil current or future foreseen or unforeseen cash requirements coming from insurance commitments to policyholders, because of an inability to sell assets in a timely manner.

C.4.b Risk management

The Company mitigates the liquidity risk in the following ways:

- The Company, through Investment Committee and regular cash follow-up, manages the liquidity risk through investments in predominately liquid financial assets and constant monitoring of expected assets maturities regarding liabilities.

The Company prepares cash forecast regularly to predict required level of liquidity levels both for short-term and medium-term.

Note: there is no quantification for this risk. The risk is governed by the nature of our investments.

C.5 Operational risk

C.5.a Definition

Operational Risk is the risk of loss resulting from the inadequacy or failure of internal processes, IT failures or deliberate external events, whether accidental or natural. The external events mentioned in this definition include those of human or natural origin.

Internal processes are specifically those that involve employees and IT systems. External events include, but are not limited to floods, fire, earthquakes and terrorist attacks. Credit or market events such as default or fluctuations in value do not fall within the scope of operational risk.

Operational risk encompasses fraud, human resources risks, legal risks, non-compliance risks, tax risks, information system risks, risks related to the provision of inappropriate financial services (conduct risk), risk related to failures in operating processes including underwriting procedures; or the use of a model (model risk) along with any potential financial consequences resulting from the management of reputation risk.

C.5.b Risk exposure

The amount of the SCR linked to the operational risk was at SEK 16 million at 31 December 2020. See table below.

in KSEK, at December 31, 2020	
Premium based risk component	16,350
Provisions based risk component	9,188
Total capital requirement for operational risk	16,350

It was 20 959 KSEK in 2019.

C.5.c Risk management

To manage operational, non-compliance and reputational risk, the Company relies on its general internal control system, a twin-dimension system providing both periodic and permanent control.

The Company also monitors the operational risks through a dedicated Committee; Internal Control Committee, where major exposures and concerns are addressed, and mitigating actions are defined.

C.6 Other material risks

Any significant changes in taxes could impact the Company's resources and liquidity requirements.

C.7 Any other information

No other specific information.

D. Valuation for Solvency Purposes

D.1 Assets

The assets in the Company's balance sheet at 31 December 2020 are comprised as follows:

<i>In KSEK, at December 31, 2020</i>	<i>Référence</i>	Solvency 2 Balance sheet	Annual Financial report
Deferred acquisition costs	A	-	13 018
Other intangible assets	B	-	-
Deferred tax assets	C	20 528	10 287
Property held for own use	D	-	-
Investments (other than assets held for index-linked and unit-linked contracts)	E	703 707	703 707
Reinsurance receivables	F	14 244	14 973
Deposits to cedants		294	294
Insurance and intermediaries receivables	G	144	144
Reinsurance receivables	G	5 547	5 037
Receivables (trade, not insurance)		18 425	18 425
Cash and cash equivalents		140 937	140 937
Other assets		18 915	18 915
TOTAL ASSETS		922 741	925 737

Letters A to G refer to the assessment methods described below. The other items do not call for any particular comments on the valuation methods used to prepare the financial statements.

Reconciliation with the financial statements and method for evaluating assets:

<i>In KSEK</i>	<i>Reference</i>	December 31, 2020
Financial assets fair value	E	-
Goodwill and intangible assets fair value	A and F	-
Valuation of insurance recoverables under Solvency II and elimination of deferred acquisition costs	A, C and F	- 13 747
Revaluation of subordinated liabilities	C	-
Others	C	510
Assets and deferred tax liabilities compensation	C	10 241
TOTAL OF RESTATEMENTS		- 2 996

Assets are valued "at the amount for which they could be exchanged between knowledgeable and willing parties in an arms-length transaction".

A. Deferred acquisition costs

The share not chargeable to the expenses incurred when purchasing insurance contracts is entered with assets in the Company's balance sheet. These acquisition expenses reported are eliminated under Solvency II.

C. Deferred tax assets

Deferred taxes are determined by the method described in paragraph D.5.a (Other information). Deferred tax assets are recognized for all deductible temporary differences and unused carry-forwards of tax losses only to the extent that the entity in question will in all probability generate future taxable profits against which these temporary differences and tax losses can be offset.

D. Equipment for own use

Equipment for own use are valued at their economic value, which is assumed to be consistent with a linear amortization over five years.

E. Financial investments

Financial assets are listed on the asset side of the balance sheet in accordance with the Complementary Identification Codes (CIC codes) determined by EIOPA.

Financial assets held in foreign currencies are subject to re-evaluation effect based on closing exchange rates. The re-evaluation of assets has a P&L effect, which is offset by re-evaluation of liabilities (balance sheet effect).

The fair value of the financial assets is determined by the external asset manager of the Company, obtained directly from market data.

F. Share of reinsurers in the technical reserves

The method for assessing the ceded technical reserves follows the same principles as those of the technical reserves described in paragraph D.2. At 31 December 2020 the ceded technical reserves came to 14 244 KSEK.

G. Receivables from insurance and reinsurance transactions

These receivables have a contractual maturity of less than one year. They are assessed at their notional value, possibly corrected by a provision to take into account the credit quality specific to each counterparty.

At 31 December 2020, the receivables from reinsurance transactions mainly correspond to the current accounts of reinsurers.

D.2 Technical provisions

D.2.a Summary and reconciliation with the financial statements

K SEK	2019			2020		
	BEL	Risk Margin	Total	BEL	Risk Margin	Total
Total BEL	244,429	18,589	263,018	308,628	13,154	321,783
Total Non-life (excluding health)	38,636	10,389	49,025	112,234	7,143	119,377
Fire and other damage to property insurance	5,855	1,387	7,241	-	-	-
Miscellaneous financial loss	32,781	9,002	41,783	112,234	7,143	119,377
Total Health (similar to non-life)	202,717	8,108	210,826	193,600	5,981	199,582
Medical expense insurance	81,695	1,343	83,038	38,790	872	39,662
Income protection insurance	121,023	6,766	127,788	154,810	5,109	159,920
Total Health (similar to life)	-	-	-	-	-	-
Health insurance	-	-	-	-	-	-
Total Life (excluding health)	3,076	92	3,168	2,793	30	2,823
Other life insurance	3,076	92	3,168	2,793	30	2,823

The BEL gross of recoverable on December 31, 2020 decreased by 26% to SEK 308 million compared to SEK 244 million on December 31, 2019. The increase of BEL compared to 2019 results from the claims level in 2020 due to the Covid-19 crisis.

D.2.b Principles and assumptions for valuing the technical provisions

Technical provisions are valued in accordance with Article 77 of the Solvency II Directive which states that the value of technical provisions shall be equal to the sum of a best estimate and a risk margin.

Best Estimate of Liabilities is assessed as the probability-weighted average of all future cash-flows arising from the existing valued contracts, taking account of the time value of money (expected present value of future cash-flows), using the relevant risk-free interest rate term structure.

Insurance obligations are segmented by product, sub-product and risk-categories to define homogeneous risk groups. The granularity is derived from existing local reporting and from the company specific accounting and Head Office reporting processes.

The cash-flow projection used in the calculation of the best estimate takes into account of all the cash in- and out-flows required to settle the insurance and reinsurance obligations over the lifetime thereof. The calculation is based upon up-to-date and credible information and realistic assumptions and is performed using adequate, applicable and relevant actuarial and statistical methods.

The Risk Margin is assessed as the cost of providing an amount of eligible own funds equal to the Solvency Capital Requirement necessary to support the insurance obligations over the lifetime thereof.

The cost-of-capital rate which is prescribed by EIOPA is applied to the run-off of SCR from the valuation date to extinction of all insurance obligations and discounted at the risk-free rate.

The risk margin is calculated using the 'method 2' of the simplifications proposed in Guideline 61 of the Guidelines on the valuation of technical provisions (EIOPA-BoS-14/166). This methodology is based on the projection of the risk sub-modules in proportion to certain indicators called 'drivers'.

D.2.c Level of uncertainty related to the value of technical provisions

The main factors of uncertainty identified in the technical reserves are:

- their transposition into a risk neutral environment without real-world assumptions (target policyholder benefit rate, assets dividend rate, etc.);

- the Best Estimate projected costs, in particular for rapid development or run-off portfolios.

D.2.d Reinsurance recoverables

The reinsurance program aimed at reducing underwriting risk, in particular the following risks: Peak risk (related to exposure to risk on a single head or risk) and Catastrophe risk (linked to exposure to risk over a single event - concentration risk).

D.3 Other liabilities

<i>In KSEK, at December 31, 2020</i>	<i>Reference</i>	Balance sheet solvency 2	Annual financial reports
Technical provisions incl. Best estimate of liabilities (BEL)		-	-
Provisions for pensions and other benefits	A	321 783	287 572
Liabilities for cash deposits of reinsurers	B	2 727	2 727
Deferred tax liabilities	C	-	-
Financial liabilities other than debts owed to credit institutions	D	-	-
Insurance & intermediaries payables	E	-	-
Reinsurance payables	E	510	-
Other debts (Not linked to insurance)		26 697	26 697
Subordinated liabilities in Basic Own Funds	F	-	-
Any other debts, not elsewhere shown		54 309	54 411
Other liabilities		406 026	371 407
Ordinary share capital, Premiums		152 700	152 700
Reconciliation reserve		343 488	401 630
Dividends		-	-
Own funds		496 188	554 330
Total Liabilities		902 214	925 737

Notes A to F refer to the methods for valuing other liabilities described below.

Reconciliation with the financial statements and methods for evaluating other liabilities

<i>In KSEK</i>	<i>Reference</i>	December 31, 2020
Fair value financial assets	C	-
Valuation of insurance liabilities under Solvency II and elimination of deferred acquisition costs	C	- 24 033
Revaluation of subordinated liabilities	F	-
Others	B, C, D and E	510
Assets and deferred tax liabilities compensation	C	-
TOTAL OF RESTATEMENTS		- 23 523

Other liabilities are valued "at the amount for which they could be exchanged between knowledgeable and willing parties in an arms-length transaction".

B. Deposits from reinsurers

At 31 December 2020, the line item "Deposits from reinsurers" for an amount of 2 727 KSEK mainly corresponds to the cash deposits of the Company.

C. Deferred tax liabilities

Deferred tax liabilities are tax liabilities. They are determined in accordance with the method described in paragraph D.5., Other information.

E. Liabilities from reinsurance transactions

These liabilities have a contractual maturity of less than one year. In principle, they are valued at notional value.

D.4 Alternative methods for valuation

The Company does not use any alternative methods for valuation.

D.5 Any other information

The Company uses the risk-free interest rate curve provided by EIOPA without Volatility Adjustment.

The Company does not use the following transitional measures:

- the matching adjustment referred to in Article 77b of Directive 2009/138/EC
- the transitional risk-free interest rate-term structure referred to Article 308c of Directive 2009/138/EC
- the transitional deduction referred to in Article 308d of Directive 2009/138/EC

Deferred taxes

Deferred taxes are calculated on the basis of the temporary differences between the carrying amount of assets and liabilities in the Solvency II balance sheet and their tax base.

Tax credits and tax loss carry-forwards are recognized and valued in compliance with IRFS standards. Deferred tax assets and liabilities are valued using the liability method, using the tax rate which is expected to apply to the period when the asset is realized or the liability is settled, based on tax rates and tax laws that have been or will have been enacted before the balance sheet closing date of that period. They are not discounted.

Deferred tax assets are recognized in the balance sheet if it can be shown that they can be absorbed by future taxable profits within a reasonable period.

Deferred tax assets and deferred tax liabilities may be offset if, and only if:

- they relate to the taxes deducted by the same tax authority and from the same taxable entity;
- there is a legally enforceable right to offset the payable tax assets with the payable tax liability.

The Company calculates its deferred tax on the basis of the local tax required and according to the principles described above. The position of deferred tax in the Solvency II balance sheet is offset by each entity.

At 31 December 2020, deferred tax assets were 20 528 KSEK.

E. Capital Management

E.1 Own funds

E.1.a Objectives and policy for own funds management to cover the SCR/MCR

The objective for the Company's capital management is to ensure an optimized and sufficient capital structure, to satisfy prudential requirements and to guarantee adequate financial resilience.

The Company's Capital Management Policy aim at setting the boundaries for the wished level of coverage for the SCR. The available capital will be set accordingly and management actions will be defined for situations outer the boundaries.

The primary objectives of the policy are, on the one hand, to ensure that BNPPCF maintain capital ratios that protect its viability in the long term interest of the policyholder and thus comply with externally imposed capital requirements and, on the other hand, to use capital effectively in the interest of its shareholder.

The target capital will be based on the risk appetite of the company and thus take into account the expected volatility of the solvency ratios (the available versus the required capital) and the exposure to stress scenarios in the ORSA.

The Company's Capital Management Policy is based on the following principles:

- ensuring a level of capital so that, 90% of the SCR absorbed, it will still be sufficient to cover the MCR
- covering greater than 100% of the SCR defined within the scope of the ORSA assessment
- being adequate for Local Capital Requirement based on regulator coverage target (until defined by local regulator assumed to be 100% SCR).

Depending on the levels of solvency ratios observed on a quarterly basis and the forecasts made under ORSA and yearly updates if necessary, remedial actions to adjust the capital may be initiated.

E.1.b Structure, amount and quality of own funds

Available own funds were 496 188 KSEK at 31 December 2020 and comprised the following elements:

<i>In KSEK, at</i>	December 31, 2020
Ordinary share capital	30 000
Share premiums	122 700
Reconciliation reserve	343 488
Subordinated liabilities	-
Guarantee funds	-
TOTAL	496 188

Own fund items are ranked at three tiers with a graduation in quality, according to their availability, their priority subordination for hedging policyholder undertakings, and their duration.

The composition by Tier is as follows:

In KSEK, at	December 31, 2020					December 31, 2019
	Total	Tier 1 - unrestricted	Tier 1 - restricted	Tier 2	Tier 3	
Basic own funds before deduction for participations in other financial sector as foreseen in article 68 of Delegated Regulation 2015/35						
Ordinary share capital (gross of own shares)	30 000	30 000	-	-	-	30 000
Share premium account related to ordinary share capital	122 700	122 700	-	-	-	122 700
Surplus funds	-	-	-	-	-	-
Preference shares	-	-	-	-	-	-
Share premium account related to preference shares	-	-	-	-	-	-
Reconciliation reserve before DTA impact	343 488	343 488	-	-	-	410 722
Subordinated liabilities	-	-	-	-	-	-
An amount equal to the value of net deferred tax assets	20 528				20 528	6 751
Other own fund items approved by the supervisory authority as basic own funds not specified above						
Own funds from the financial statements that should not be represented by the reconciliation reserve and do not meet the criteria to be classified as Solvency II own funds						
Own funds from the financial statements that should not be represented by the reconciliation reserve and do not meet the criteria to be classified as Solvency II own funds	-	-	-	-	-	-
Deductions not included in the reconciliation reserve						
Deductions for participations in financial and credit institutions	-	-	-	-	-	-
Total basic own funds after deductions	516 716	496 188	-	-	20 528	570 173

The reconciliation reserve is broken down as follows:

In KSEK, at	December 31, 2020	December 31, 2019
Non restricted equity	401 630	415 758
Profit or loss brought forward	433 054	392 541
Profit or loss for the financial year	-	31 424
Guarantee funds		
Solvency II restatements	- 37 614	1 715
Impact on future profits before taxes	-	47 958
Revaluation of financial assets	-	-
RM & BEL variation	-	34 940
Revaluation of subordinated liabilities		
Elimination of deferred acquisition costs	-	13 018
Goodwill and intangible elimination		
Other restatements	102	107
Revaluation of the deferred tax linked to growth of the basis	10 241	-
Planned distribution		
TOTAL RECONCILIATION RESERVE	364 016	417 473

None of the Company's own funds are subject to transitional arrangements and the Company has no ancillary own funds as at 31 December 2020 (2019, 0 KSEK).

E.2 Solvency Capital Requirement and Minimum Capital Requirement

E.2a Amounts of SCR and MCR

The amount of the Solvency Capital Requirement and Minimum Capital Requirement at 31 December, 2020 are SEK 214 million and SEK 90 million respectively.

E.2b Amount of SCR per risk module

in KSEK

SCR per risk module in K SEK, at	2020	2019	2018
Market risk	29,633	40,529	31,830
Counterparty default risk	5,709	5,396	14,990
Life underwriting risk	600	1,697	1,770
Health underwriting risk	112,193	139,519	133,680
Non-life underwriting risk	143,217	179,440	214,691
Diversification	-93,714	-118,763	-122,432
Intangible asset risk	0	0	0
Basic Solvency Capital Requirement	197,637	247,818	274,529

Operational risk	16,350	20,959	27,181
Loss-absorbing capacity of technical provisions	0	0	0
Loss-absorbing capacity of deferred taxes	0	0	0
Solvency Capital Requirement	213,987	268,777	301,711

The level of SCR has decreased since 2019 due to the decrease of the exposure level (lower sales volumes and cut-off of activities).

E.2c Information on the data used for calculating the MCR

The data used for calculating the MCR is:

- the technical reserves described in paragraph D.2;
- the amounts of the net reinsurance premiums issued for financial year 2020;
- capital at risk under Solvency I.

in KSEK

Overall MCR calculation	2020	2019	2018
Linear MCR	90,065	85,680	108,985
SCR	213,987	268,777	301,711
MCR cap	96,294	120,950	135,770
MCR floor	53,497	67,194	75,428
Combined MCR	90,065	85,680	108,985
Absolute floor of the MCR	25,913	26,185	26,004
Minimum Capital Requirement	90,065	85,680	108,985

E.3 Use of the duration-based equity risk sub-module in the calculation of the Solvency Capital Requirement

The Company does not apply this.

E.4 Differences between the standard formula and any internal model used

The Company does not use any internal model.

E.5 Non-compliance with the Minimum Capital Requirement and non-compliance with the Solvency Capital Requirement

There was no situation of non-compliance during 2020.

E.6 Any other information

No other specific information.

APPENDICES – QUANTITATIVE TEMPLATES DISCLOSURES

- The following appendix gives the quantitative templates available for public disclosure.
- They are reported in SEK.
- For presentation purposes the empty LoB are not presented
- The following templates are not relevant for the situation of the company and therefore, not attached:
 - S22.01.21
 - S25.02.21
 - S25.03.21
